KIRT ASIA S. MAG-USARA

Cabuyao, Laguna | kirtmagusara94@gmail.com | +63 927 496 5366 | GitHub | LinkedIn

Computer Science student at University of Cabuyao with hands-on experience in software testing, systems analysis, and technical documentation through academic projects. Created test case documents, system diagrams, READMEs, and user guides for ACUITY and Kalinga.

EDUCATION

UNIVERSITY OF CABUYAO | Cabuyao, Laguna

Bachelor of Science in Computer Science | Expected May 2027

• Dean's Lister, 1st Semester, A.Y. 2023–2024.

• 6th Place, Group Stage 3, CodeChum National Programming Challenge 2025 (Season 2).

Relevant Coursework: Data Structures and Algorithms, Web Technologies, Information Management, Object-Oriented

Programming, Systems Analysis and Design, Application Development, Game Programming.

PROJECTS

ACUITY Framework - Open-Source NLP & Recommendation Library | 2026

Thesis project | Python, sklearn-crfsuite, pytest | PyPI

• Reached 0.796 token-level micro-F1 by training a CRF to extract business names, categories, and locations from Taglish posts (precision: 0.865; recall: 0.737).

• Packaged NLP extraction and hybrid recommendations into a modular, dependency-light Python library; used pytest checks for edge cases and threshold boundaries and prepared README documentation.

• Used pytest checks to validate edge cases and threshold boundaries in a modular information-extraction and recommendation library.

ACUITY - Web Platform & Verification Engine | 2026

Thesis project | Flask, React, Vite, SQLAlchemy, Leaflet, JWT, REST APIs | Live App | Admin

• Built a Flask/React discovery prototype with 164 business profiles extracted from community posts, integrating map search and BPLO registry reconciliation.

• Added fuzzy-match approvals, hashed-PIN edit protection, and snapshot rollbacks; the prototype received a 3.62/4 usability rating from 34 survey participants.

• Created test case documentation, system diagrams, READMEs, and user guides to support testing, technical understanding, and system use.

Kalinga - Elderly Care and Health Assistance App | 2026

Software Engineering 1 project | React Native, Expo, TypeScript, Firebase

• Co-developed an elderly-care app as one of two developers on a four-person team, supporting medications, health tracking, government services, and caretaker coordination.

• Developed accessibility features: buttons that enlarge after missed taps, voice-assisted navigation, and text-to-speech reminders for unseen notifications.

• Prepared test case documents, system diagrams, and READMEs to support application testing and explain system functionality.

LEADERSHIP & ACTIVITIES

Esports Committee / Facilitator - CCS Sportsfest & IT Skills Olympics | 2024–2025

• Helped establish tournament rules, refereed online and onsite matches, and livestreamed matches on social platforms.

DENHA's Digital Drive - Technical Committee | 2024

• Helped adult and elderly women build brands using Canva and Facebook, assisted hands-on activities, and managed presentation slides.

TECHNICAL SKILLS

Analysis & Documentation: Test case documentation, system diagramming, technical writing, README documentation, user guide development, usability evaluation

Testing & Tools: pytest, Selenium, Git, GitHub, GitHub Actions

Tools & Data: SQLite, PostgreSQL, Firebase Authentication, Vite, Leaflet
